The laboratory grown diamond described in this report (Report) has been graded (IGI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). IGI employs and utilizes those techniques and equipment (a manufacturing process) that produce diamonds that are indistinguishable from natural diamonds. IGI uses the following instruments and such other instruments and/or processes as deemed appropriate by IGI. This report includes additional information and internal characteristics of the diamond, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. IT IS PROVIDED AS INFORMATION ONLY. FOR MORE INFORMATION, PLEASE GO TO WWW.IGI.ORG OR CALL 1-888-BUY-IGI.
