The laboratory grown diamond described in this report (Report) has been graded in accordance with the International Gemological Institute's (IGI) Laboratory Grown Diamond Grading System (LGD). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (or manufactured process). IGI employs and utilizes those techniques and equipment (or manufacturing process) that are deemed appropriate by IGI. This report includes optical measuring devices, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments used in the grading process. The IGI Laboratory Grown Diamond Grading System is based on the importance of and interrelationship between cut, color, clarity and carat weight.

REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE. DE GRADING IS SUBJECT TO REVISION. IGI DOES NOT GUARANTEE THE ACCURACY OF THE GRADE. ADDITIONAL INFORMATION, IMPORTANT LIMITATIONS AND DISCLAIMERS, PLEASE GO TO WWW.IGI.ORG OR CALL 1-888-897-4642.
