The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inspected by International Gemological Institute (IGI). A laboratory grown diamond is one that has essentially the same chemical, physical, and optical properties as a natural diamond, but is created in a laboratory environment (a manufactured product). IGI employs and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected light microscopy, binocular microscope, master color comparison stones, non-contact optical spectrometry, and/or processes as deemed appropriate by IGI. This Report includes only the results of the examination and testing performed by IGI. IGI does not include any warranty, express or implied, as to the accuracy of the results of the examination and testing performed by IGI. The importance of and interrelationship between cut, color, clarity and carat weight to the value of a diamond is well known. IGI is not a guarantor of value. THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE. FOR ADDITIONAL INFORMATION, IMPORTANT LIMITATIONS AND DISCLAIMERS, PLEASE GO TO WWW.IGI.ORG OR CALL 1-888-807-7465.
