The laboratory grown diamond described in this Report ("Report") has been graded in accordance with the International Gemological Institute's International Gemological Institute (IGI) Laboratory Grown Diamond Grading System (IGI LGS). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). IGI employs and utilizes those techniques and equipment (a manufactured product) that are used in the diamond industry to identify, inspect, measure, and/or process as deemed appropriate by IGI. This Report includes optical images, binocular microscope, master color comparison stones, non-contact-optical measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by IGI. This Report includes only those characteristics and relationships between cut, color, clarity and carat weight.

THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE OR THE REPORTING LABORATORY. THE REPORTING LABORATORY IS NOT RESPONSIBLE FOR ANY ADDITIONAL INFORMATION, IMPORTANT LIMITATIONS AND DISCLAIMERS. PLEASE GO TO WWW.IGI.ORG OR CALL 1-888-844-IGI5.
