The laboratory grown diamond described in this report (Report) has been graded, tested, analyzed, examined and/or measured by International Gemological Institute (IGI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man. Gemstones are graded and tested by IGI using the same methods and equipment as those used for natural diamonds. This includes the use of a 10X magnification, certified triplet loupe, binocular microscope, master color comparison stones, non-contact optical measuring device, Diamond Sure™, Diamond View™, SpectroPhotometer and such other instruments as may be necessary. IGI is not responsible for the accuracy of any other report or appraisal. A duly accredited diamondologist or jeweller can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight. THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE FOR ADDITIONAL INFORMATION, IMPORTANT LIMITATIONS AND DISCLAIMERS. PLEASE GO TO WWW.IGI.ORG OR CALL 1-888-BUY-IGI'S.
