This laboratory grown diamond described in this report (Report), has been graded, tested, analyzed, examined and/or inspected by International Gemological Institute (IGI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by a process that does not occur in nature. IGI is the world's largest and most prominent laboratory grown diamond grader. IGI's grading system is the most stringent and currently available to IGI, including, without limitation, 10x magnification, connected triplet loupe, binocular microscope, master color comparison stones, non-contact optical measuring device, Diamond Sure™ Diamond Viewer Spectrophotometer and such other instruments and procedures as may be necessary to properly grade and report on a diamond. IGI's grading system is based on the International Gemological Institute's (IGI) diamond grading system and is subject to the importance of and interrelationship between cut, color, clarity and carat weight. IGI's grading system is based on the International Gemological Institute's (IGI) diamond grading system and is subject to the importance of and interrelationship between cut, color, clarity and carat weight. THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE REVIEW THE LIMITATIONS AND RESTRICTIONS SET FORTH ONLINE FOR ADDITIONAL INFORMATION, IMPORTANT LIMITATIONS AND DISCLAIMERS, PLEASE GO TO WWW.IGI.ORG OR CALL 1-888-800-IGI.
