The IGI standard grading system is based on the same principles and optical properties as a mined diamond, with the exception of being grown by man. IGI manufactures products, IGI employs and utilizes those techniques and equipment currently available to IGI, including without limitation, optical and spectroscopic measuring devices, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as determined appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with the importance of and relationship between color, clarity, and carat weight.
