The laboratory grown diamond described in this report (Report) has been graded, tested, analyzed, examined and/or included by International Gemological Institute (IGI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man-made processes. IGI's grading system is based on the same criteria as the International Gemological Institute's (IGI) grading system, with the exception of being grown by man-made processes. IGI's grading system is based on the same criteria as the International Gemological Institute's (IGI) grading system, with the exception of being grown by man-made processes.
