The laboratory grown diamond described in this report (Report) has been graded (IGI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). IGI employs and utilizes those techniques and instruments used in the grading of mined diamonds. IGI uses a variety of instruments including: triple-lens loupe, binocular microscope, master color comparison stones, non-contact optical measuring device, Diamond Sure™, Diamond View™, SpectraPhotometer and such other instruments and/or processes as deemed appropriate by IGI. This report includes a description of the diamond's appearance, including color, clarity and carat weight. THIS REPORT IS NEITHER A GUARANTEE, VALUATION, NOR APPRAISAL OF THE GEMSTONE DESCRIBED HEREIN. PLEASE CONSULT AN APPROPRIATE PROFESSIONAL APPRAISER FOR ANY ADDITIONAL INFORMATION, IMPORTANT LIMITATIONS AND DISCLAIMERS. PLEASE GO TO WWW.IGI.ORG OR CALL 1-888-88V-IGI.
